

## Life Expectancy

***TracPipe* is manufactured from a stainless steel core, with a smoke and fire retardant yellow polyethylene cover, in accordance with British Standard BS 7838.**

**It is designed to replace traditional copper and steel rigid gas pipework, from meter to appliance.**

**Stainless steel is generally regarded to have superior corrosion resistance to both copper and steel, and the cover will assist in preventing external corrosion.**

**Correctly installed, we would expect *TracPipe* to last for the design period of the fabric of the building in which it is installed.**
